

The Virtual Tour

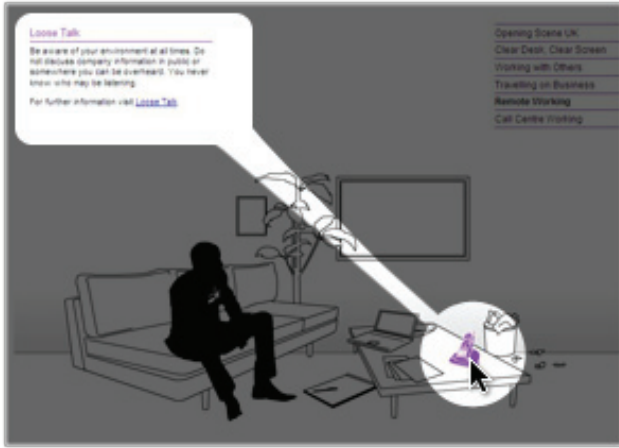

The Virtual Tour lets employees interact with common security risks encountered in normal working environments. Hotspots are used to highlight the risks in a series of scenarios; hover the cursor over the hotspots to reveal the relevant advice. From here, the user can link to the Knowledge Zone for additional information and guidance.

The benefits

The Virtual Tour provides:

- A visual and interactive representation of common security risks regularly encountered in everyday working environments.
- An accessible and informative security induction that outlines the key risks and behaviours you want your employees to recognise and demonstrate.
- Concise and relevant information that the user can easily digest.
- The opportunity to link to the Security Knowledge Zone and other related sources.
- Fully editable text tailored to your organisation's policies and top security threats.
- Accommodates most language translations.

The scenarios

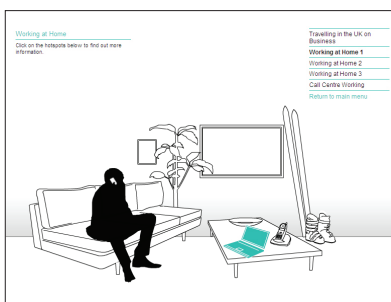

The Virtual Tour is built according to your organisation's security requirements and programme objectives. Tailor the Virtual Tour for a specific audience or to promote particular risks and threats by choosing a selection of scenarios from our portfolio.

A standard Virtual Tour consists of five scenarios with the option to add more.

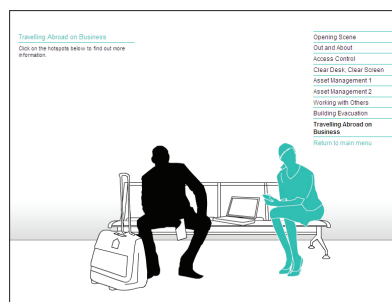

Scenarios currently available:

- People
- Clear Desk Policy
- Travelling abroad on business
- Reception
- Working at home
- Travelling in the UK on business
- Call Centre
- Building evacuation
- Company Information
- Tail-gating

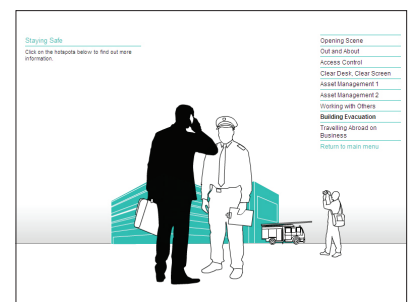

Javascript must be enabled and Flash nine installed (as a minimum) for full functionality of the Virtual Tour.
